Chennai, TN | 8825542370 | arunkumarpitchiah@gmail.com | linkedin.com/in/arunkumar-pitchiah

PROFESSIONAL SUMMARY

A passionate Business Application Developer specializing in building scalable enterprise applications and workflow automation solutions using low-code platforms. Experienced in leveraging Microsoft Power Platform to design modern business applications, automate processes, and integrate enterprise data systems. Proven ability to translate business requirements into efficient digital solutions that improve productivity and operational efficiency. Combines frontend development expertise with AI-assisted development tools to accelerate delivery and support modern digital transformation initiatives.

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300) — Microsoft

Prompt Engineering — Udemy

Microsoft Power Platform Fundamentals Training — Udemy

EXPERIENCE

Veelead Solutions - Chennai | April 2024 - Present

Software Engineer | Microsoft Power Platform Developer

Working as a Power Platform Developer responsible for designing and delivering enterprise business applications using Power Apps, Power Automate, SharePoint, and Power Pages. Experienced in end-to-end application development, solution packaging and deployment, workflow automation, requirement analysis, and enterprise data integration. Actively exploring AI-assisted development to improve delivery speed and solution quality.

Client Projects

- Designed and delivered a Helpdesk Application for a Healthcare Client enabling ticket management, comment tracking, and automated email notifications across multiple workflow stages.
- Developed an Access Card Request Application with multi-location approval routing and automated workflow notifications to streamline access management.
- Developed a Helpdesk Application for an Industrial Client with mail-based ticket creation, deep-link navigation per ticket, and automation flows.
- Supported a Manufacturing Client's CAPA Application — understood end-to-end process via KT and created user manual documentation.

Time Tracking System

- Designed and developed a role-based Time Tracking system using Power Apps, Power Automate, and SharePoint.
- Built Employee, Approver, and Power User dashboards with role-based access via security groups.
- Implemented dynamic week-based period selection, project allocation logic with %Time validation, and auto-balance adjustment.
- Developed indexed delegation tracking, collection-based performance optimization, and scheduled reminder flows.

MRB Application Upgrade

- Performed end-to-end KT and delivered reverse KT with presentation.
- Redesigned NCM ID generation logic, fixed attachment loading issues, corrected log indicator and revert logic.
- Applied fixes across Incoming, In-Process, Intercompany, and Final Inspection modules with workflow alignment.
- Created automated notification flow for work completion based on SharePoint groups.

LPA Project

- Designed and delivered multiple notification flows based on distinct business requirements, handling different trigger conditions, recipient routing, and approval-stage email notifications.
- Each flow was independently configured to meet client-specific communication and escalation requirements within the LPA process.

Data Integration & Automation

- Achieved full and scheduled SQL Server to SharePoint synchronization using Power Automate flows.
- Managed bulk data flows with error handling across seven SharePoint lists.

Internal Projects

- Developed and upgraded internal Helpdesk and Leave Management System (LMS) with improved UI/UX.
- Supported the Marketing Hub internal project.
- Delivered training sessions covering SharePoint, Power Automate, web parts, and Microsoft Forms.
- Developed PowerShell scripts to automate sprint creation in Azure DevOps Boards and recover deleted flows from Microsoft Power Automate.

R&D & Emerging Technologies

- Conducted R&D on AI-assisted Power Pages development using PAC CLI, VS Code, and GitHub Copilot.
- Explored AI integration within the Power Platform to enhance development efficiency and solution quality.

Geo Exploration Services & Analysis – Chennai | March 2022 - April 2023

Software Engineer

- Collaborated with senior developers to troubleshoot frontend issues and enhance overall user experience.
- Worked on a medical clinic web application, resolving UI issues and improving layout and responsiveness.
- Contributed to an e-commerce service management platform, fixing frontend UI issues and improving the product repair tracking interface.
- Assisted in maintaining an internal employee attendance system by fixing UI bugs and improving usability.

Tiliconveli Tech Park –Tirunelveli | June 2021 - March 2022

Technical Recruiter

- Completed communication training delivered by an IELTS trainer.
- Gained foundational knowledge of IT domain and technical skill sets.
- Understood job requirements and matched candidate profiles accordingly.
- Developed strong communication and coordination skills while starting a career in the IT industry.

Technical Skills

Low-Code Platforms

Power Apps, Power Automate, Power Pages, Dataverse

Microsoft 365 & Collaboration Platform

SharePoint Online, SharePoint Lists & Libraries, Permissions, Document Management

Data & Analytics

Power BI, SQL Server

Platforms & Integration

SharePoint, Data Integration

Development & Automation Tools

VS Code, Power Platform CLI (PAC CLI), PowerShell

Web & UI Technologies

HTML, CSS, Bootstrap, AngularJS, Responsive Design

AI-Assisted Development

Microsoft Copilot, ChatGPT, Claude

Agile & DevOps

Agile Scrum experience using Azure DevOps, including sprint planning, task tracking, and daily Scrum meetings.

Soft Skills

Quick learner, adaptability, communication, technical documentation

EDUCATION

Bachelor of Computer Applications (BCA) | 2018 - 2021

Manonmaniam Sundaranar University, Tirunelveli

SSLC &HSC | 2015 - 2018

P.L.W.A Hr Sec School, Vickiramasasingapuram

LANGUAGES

Tamil & English
